

AWS Data Platform Health Check

Twelve questions. Five minutes. Answer honestly.

1 Can three people state the platform's monthly cost within 10%?

☐ YES ☐ NO ☐ NOT SURE

2 Does your team know about failures before the business does?

☐ YES ☐ NO ☐ NOT SURE

3 Does every critical pipeline have an alarm and an owner?

☐ YES ☐ NO ☐ NOT SURE

4 Could someone other than the original author rerun each critical job?

☐ YES ☐ NO ☐ NOT SURE

5 Are your Glue jobs incremental, rather than reprocessing full history?

☐ YES ☐ NO ☐ NOT SURE

6 Do your data lake buckets have lifecycle rules?

☐ YES ☐ NO ☐ NOT SURE

7 Has unused data, reporting or platform work been decommissioned this quarter?

☐ YES ☐ NO ☐ NOT SURE

8 Are long-lived access keys eliminated or rotated within 90 days?

☐ YES ☐ NO ☐ NOT SURE

9 Is dev/test genuinely separate from production?

☐ YES ☐ NO ☐ NOT SURE

10 Do your top dashboards load in under ten seconds at 9am?

☐ YES ☐ NO ☐ NOT SURE

11 Does every board KPI have one approved definition?

☐ YES ☐ NO ☐ NOT SURE

12 Would reporting survive if your best engineer left tomorrow?

☐ YES ☐ NO ☐ NOT SURE

Count your **No** and **Not sure** answers. Three or more uncomfortable answers usually means the platform is overdue an honest look.

NEXT STEP

Put evidence behind the uncomfortable answers

A two-week, fixed-price AWS Data Platform Rescue Audit: £2,500 + VAT, scored against eight dimensions, with a 30/60/90-day plan your team can execute alone. Kill clause: if the first two days show it will not surface material value, you pay nothing.

Sample report on the page below.
